

# PangoScript

Here you can find different example Pangoscripts to help you see different ways scripting can be used. They also should just work if copy and pasted into BEYOND, as-is, or modified to your needs.

## Timeline AutoSave

CodeName "Autosave"

TimelineQuickSave Sleep 60000 *Wait 1 Minute Restart* This code is designed to create an autosave script for your timeline, since saving does pause output, it's not recommended to leave this on for operating your show. The Sleep is in milliseconds, so 60,000 is 60 seconds, you can change the timeframe to your desired save duration, just know it does save a separate backup, so more frequent saves will eat up more storage.

## Daily Schedule

## Flip Zones

## Pull Tempo from DMX

## Restart Show Softly
