

FB4 BEAM CONTENT PACK PACKET

The Pangolin FB4 Beam Content pack is a pack of 1500 brand new cues for use on the FB4 via console control. A few things to note from the creation process of this content pack.

This content pack is designed to give simple sets of gobos for use like a standard lighting fixture.

This content pack is designed to give a bunch of custom created cues in BEYOND to give a bunch of content that couldn't be created with simple gobos. These all have loops at different intervals and should play back and loop evenly.

Every cue in this content pack was made to be 500 points, Exceptions were made in more complex cues, or cues that played back better at lower point counts. This should provide 60FPS on over 98% of the cues in this content pack at 30kPPS.

Every cue in this content pack was tested on multiple types of scanners at max angle with overscanning, In order to provide the least number of tails, hot points, and smoothly completing circles.

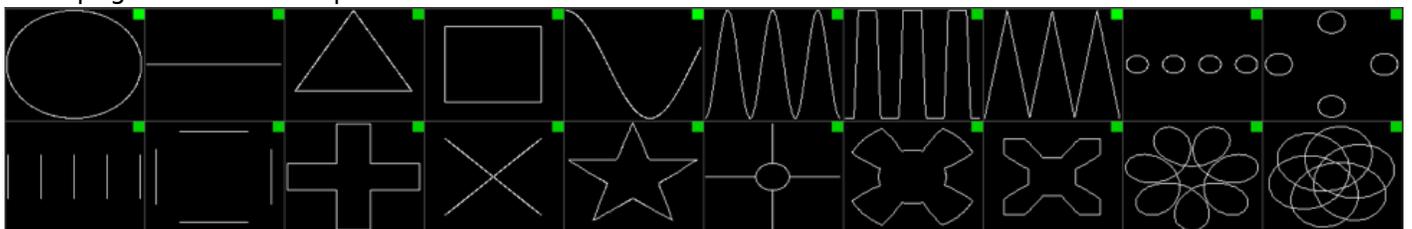

Each cue is a beat based cue, and was exported at 100BPM, default dmx value in the dmx profiles is 100 for speed, this means that you can type in the BPM or set the DMX value to the exact BPM you want and the cue will play back at that BPM

This Packet is Intended to be printed off and provided to on site designers so its easier to navigate the content, and understand the organizational concepts. Due to the nature of the pictures included below, it is best to read on a screen, but a paper copy will never hurt and make it easy to have on hand, depending on the printer, point cues will be hard to discern.

Ultra Simple

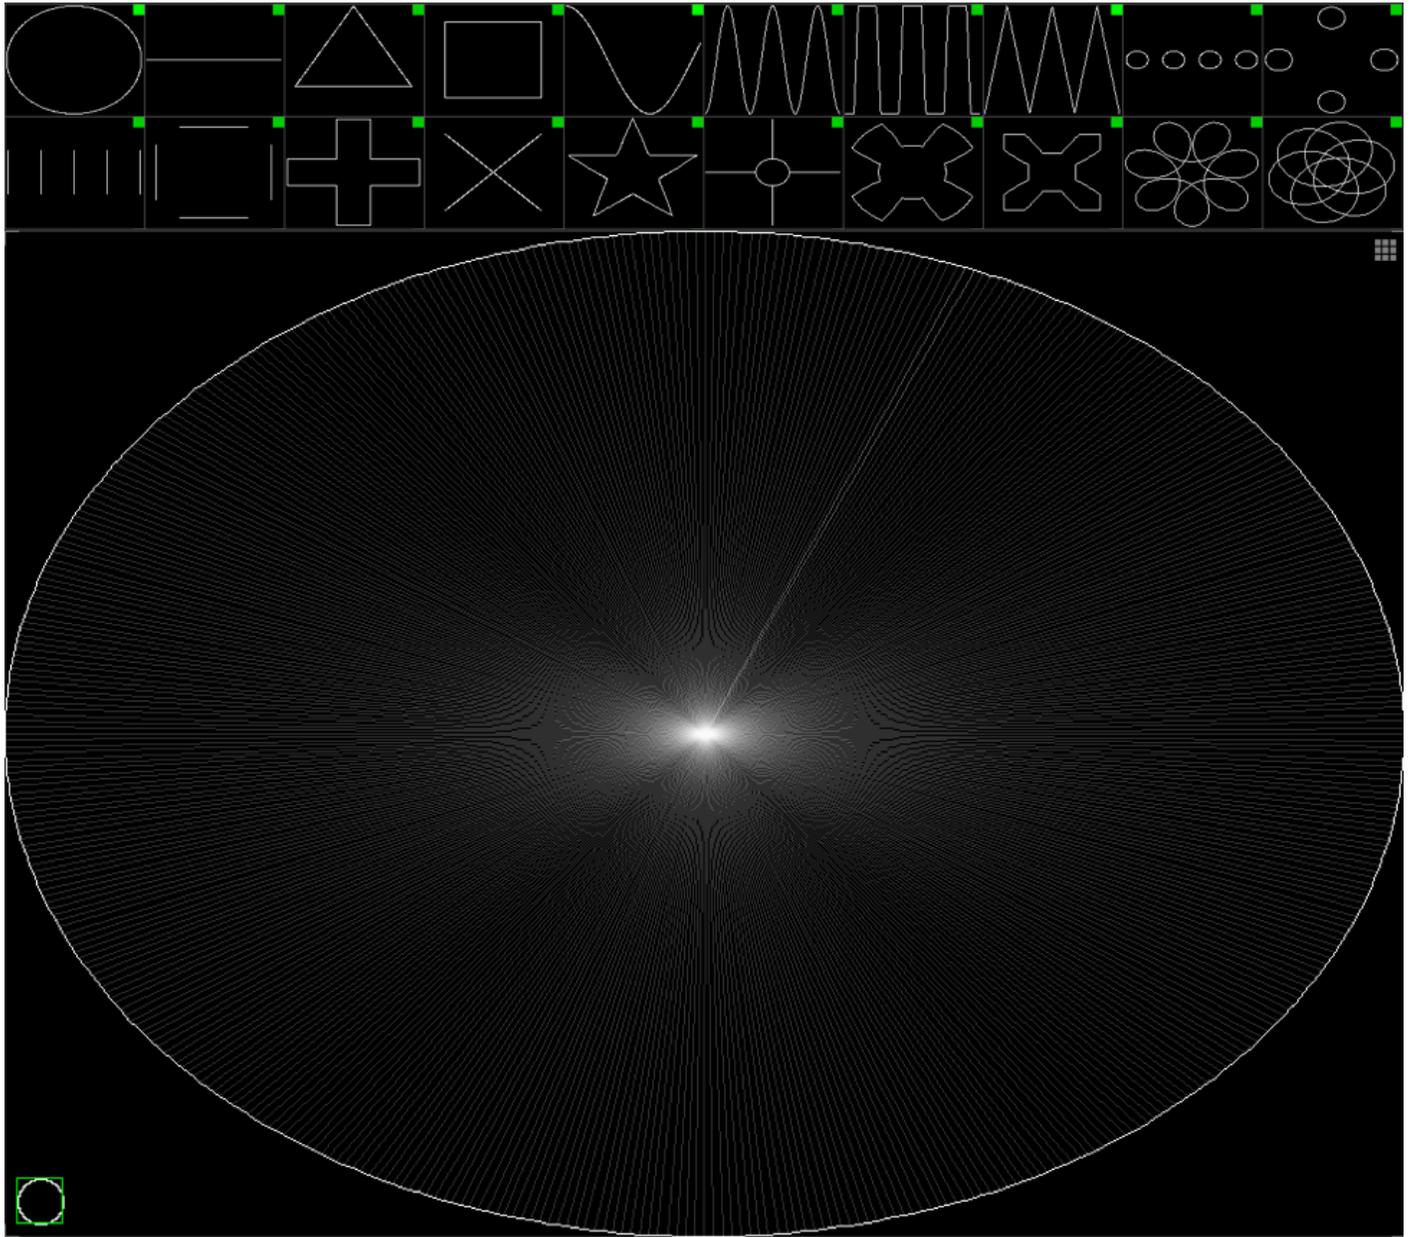

Our simplest and smallest file sized version of this content pack. It takes only moments to upload to projectors and gives 80 gobos. Use this if you are on site and do not have much time available.

Each page has these shapes:

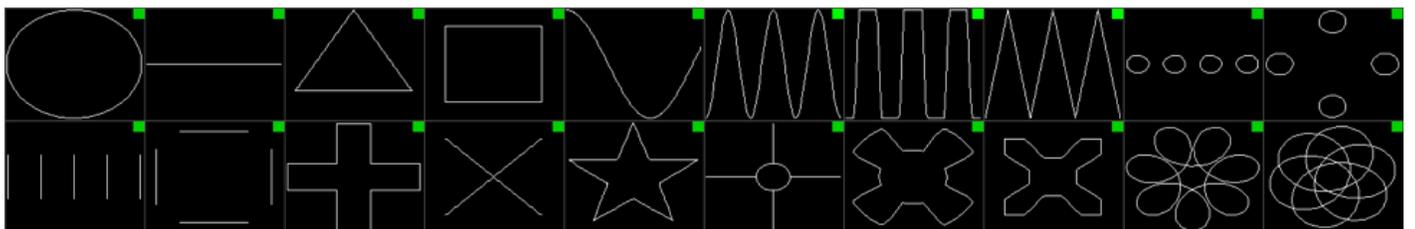

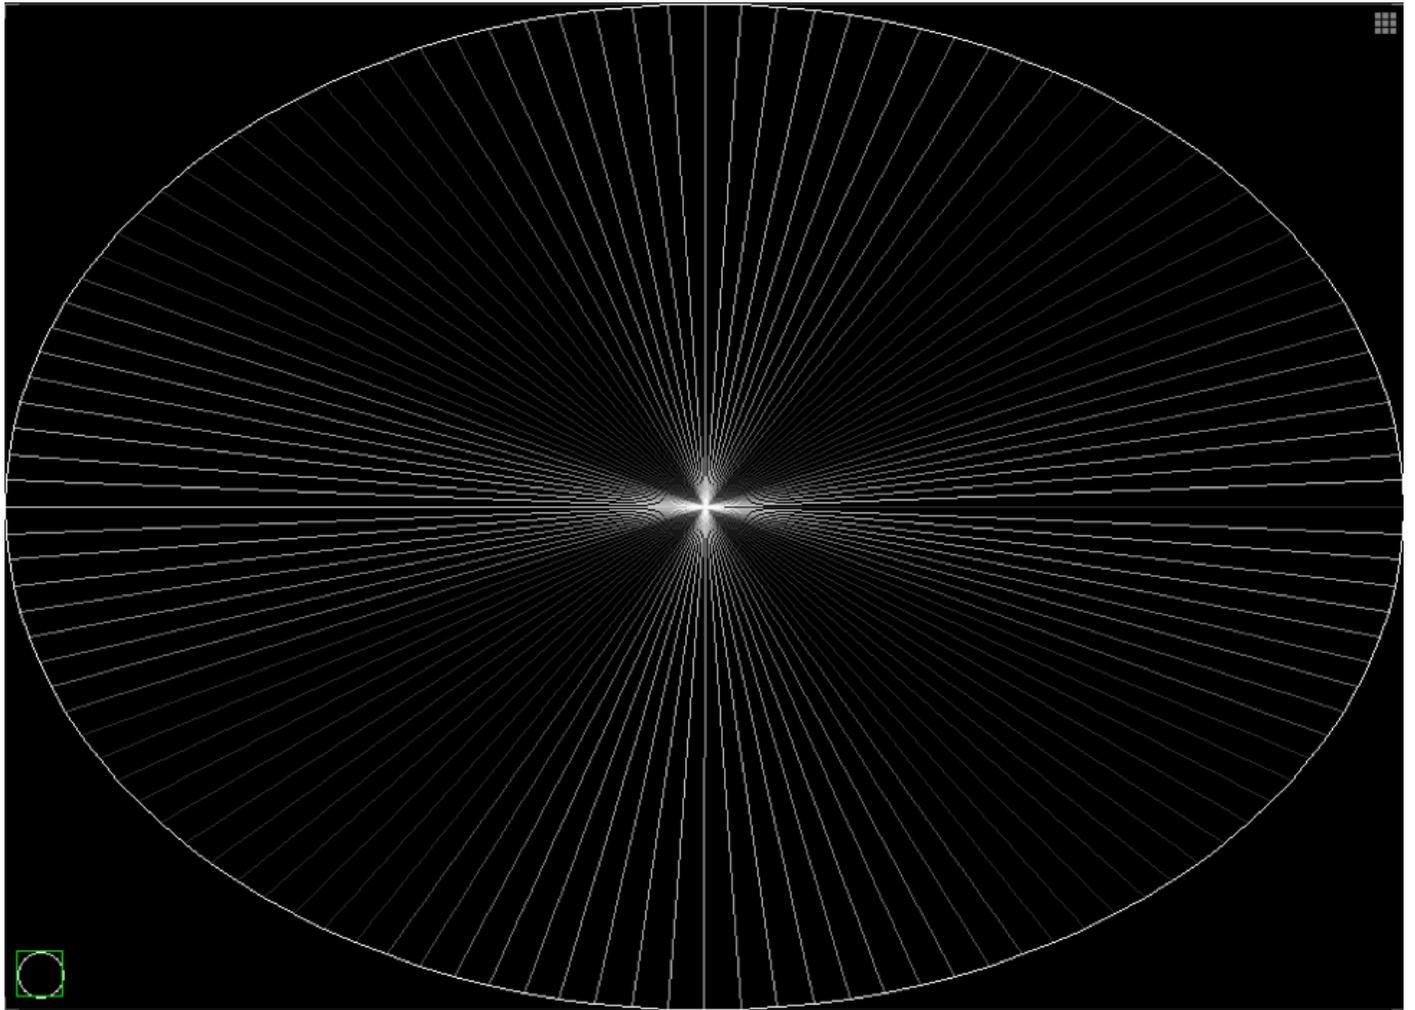

Page 1 Simple

Each page changes that shapes texture

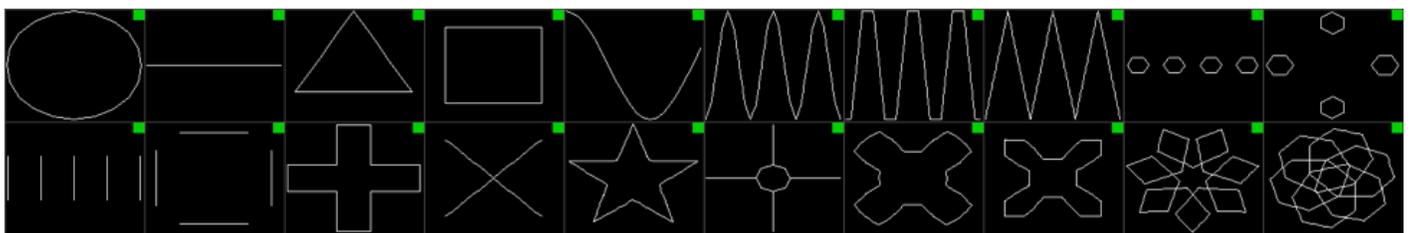

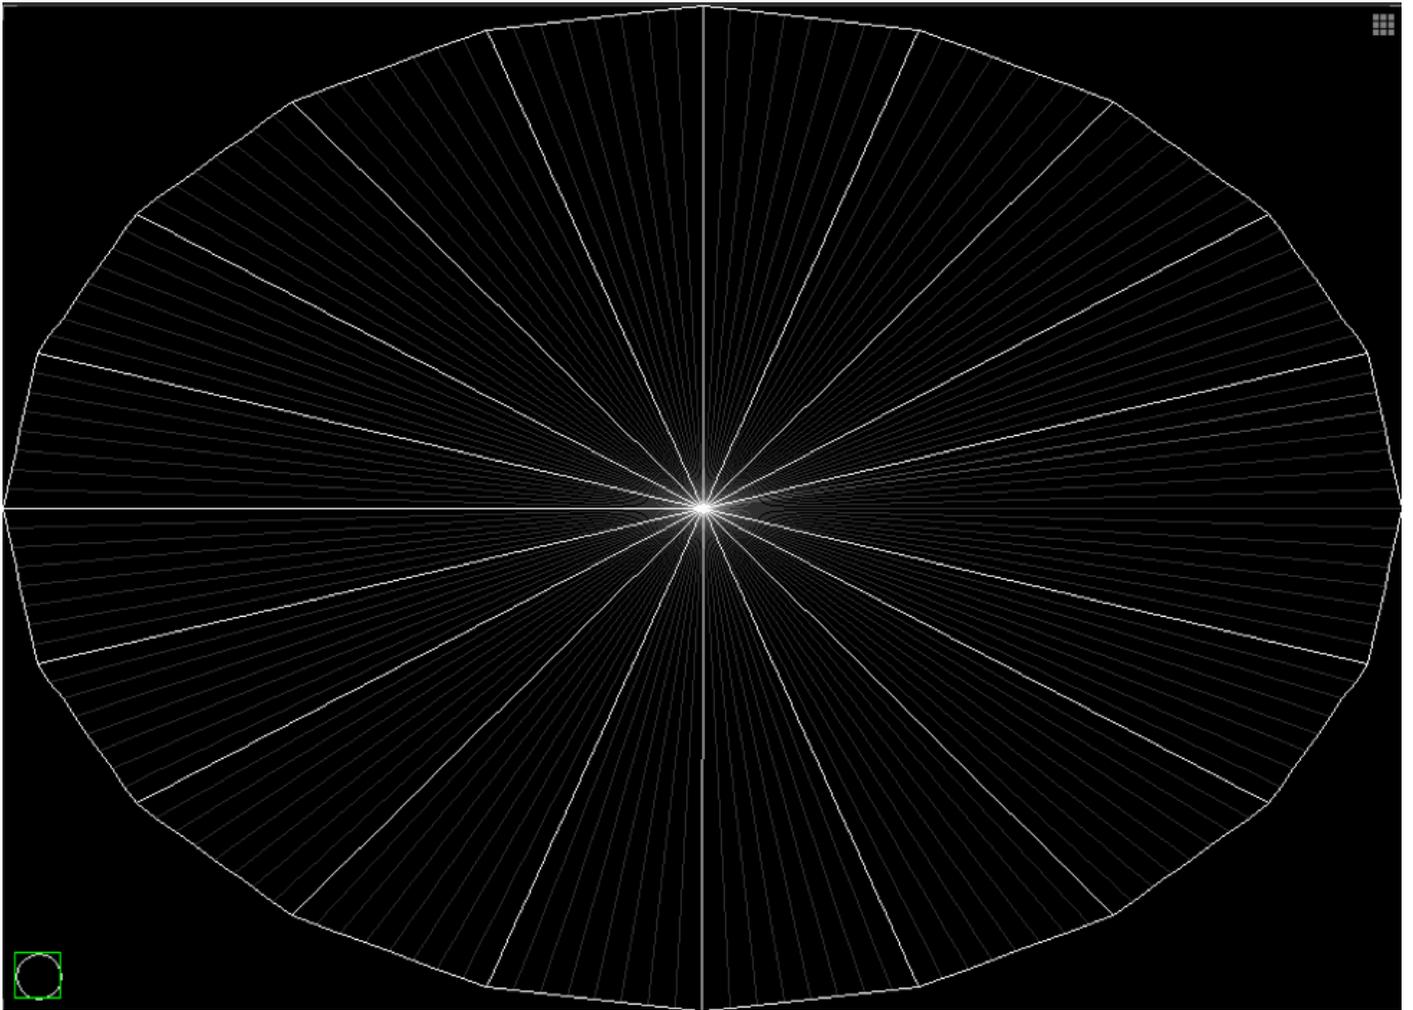

Page 2 Simple Textured

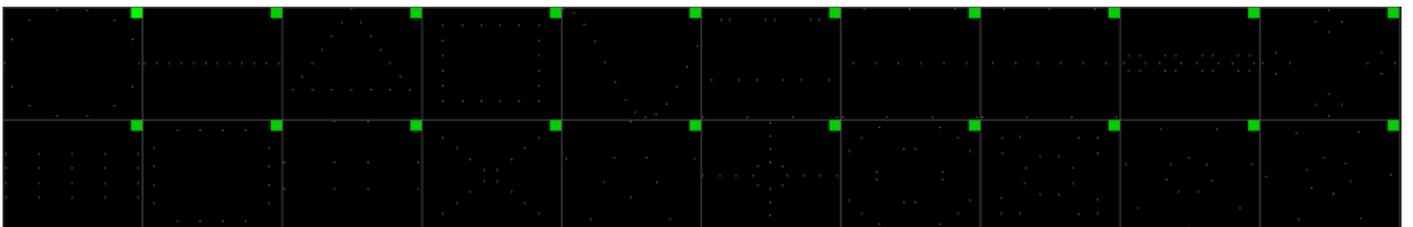

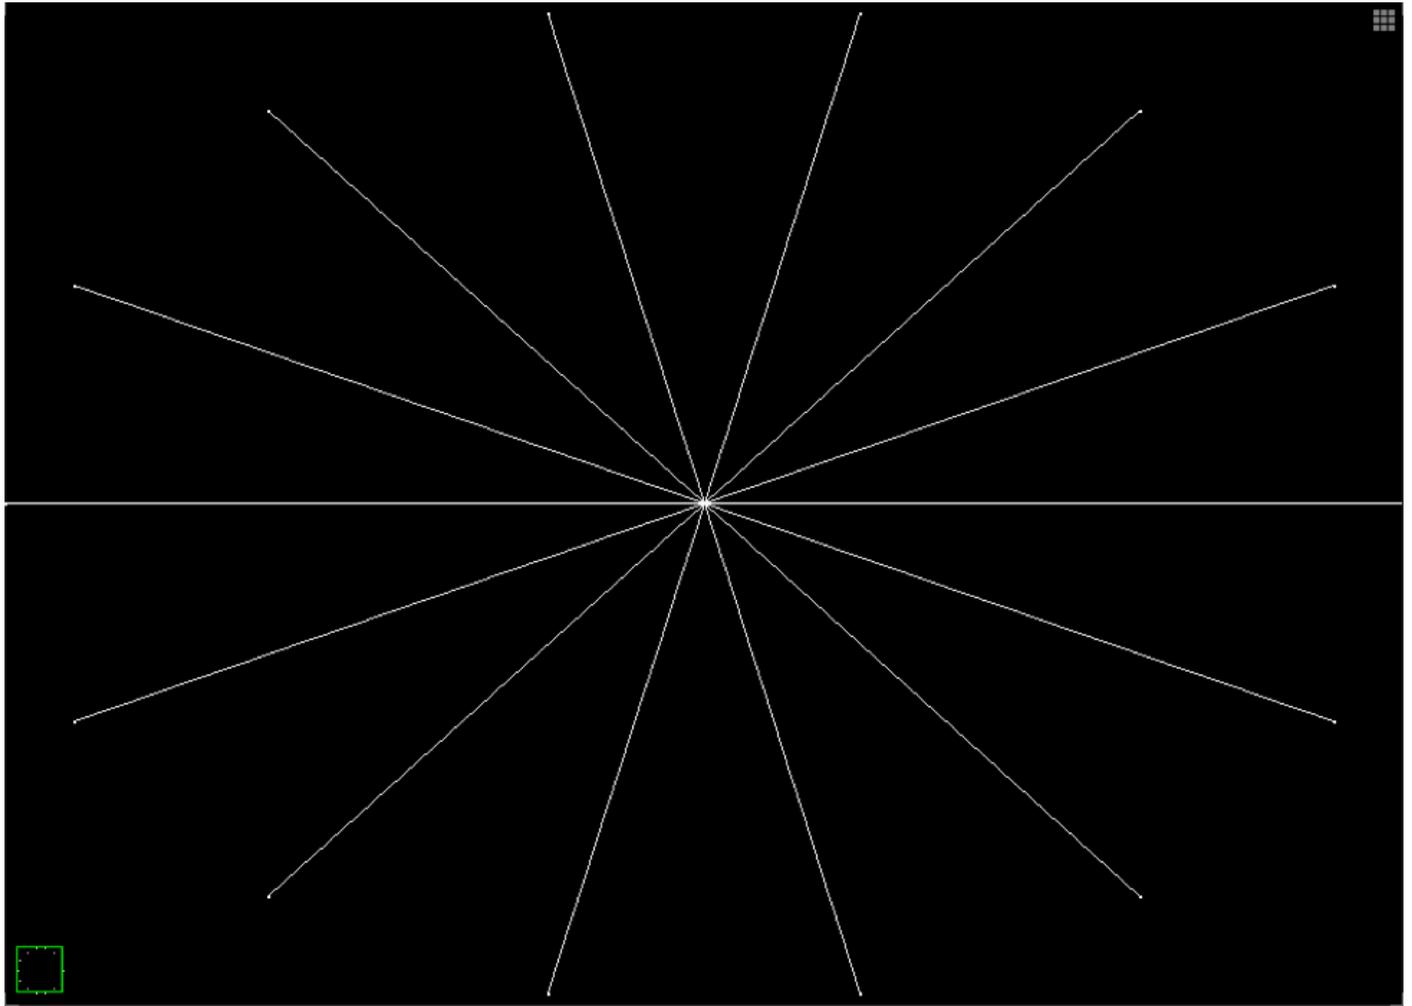

Page 3 Simples Lined Points

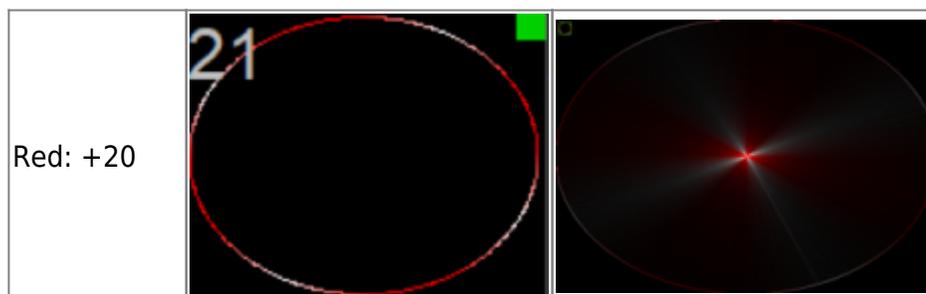

Page 4 Simple Points

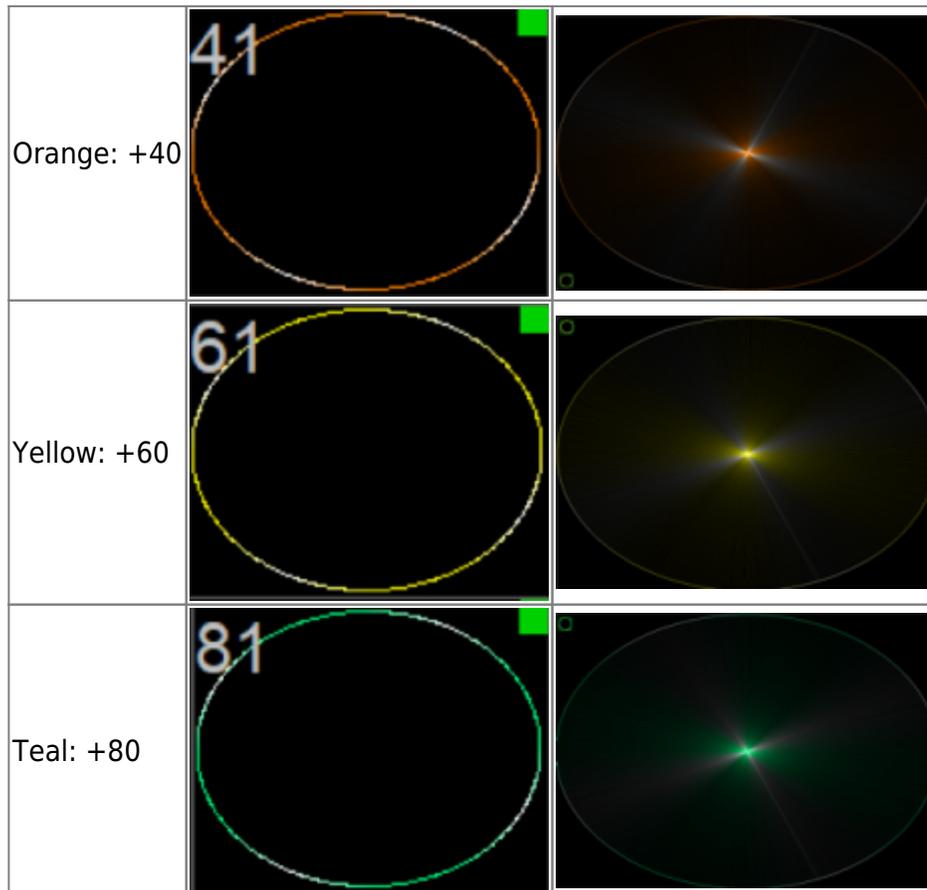

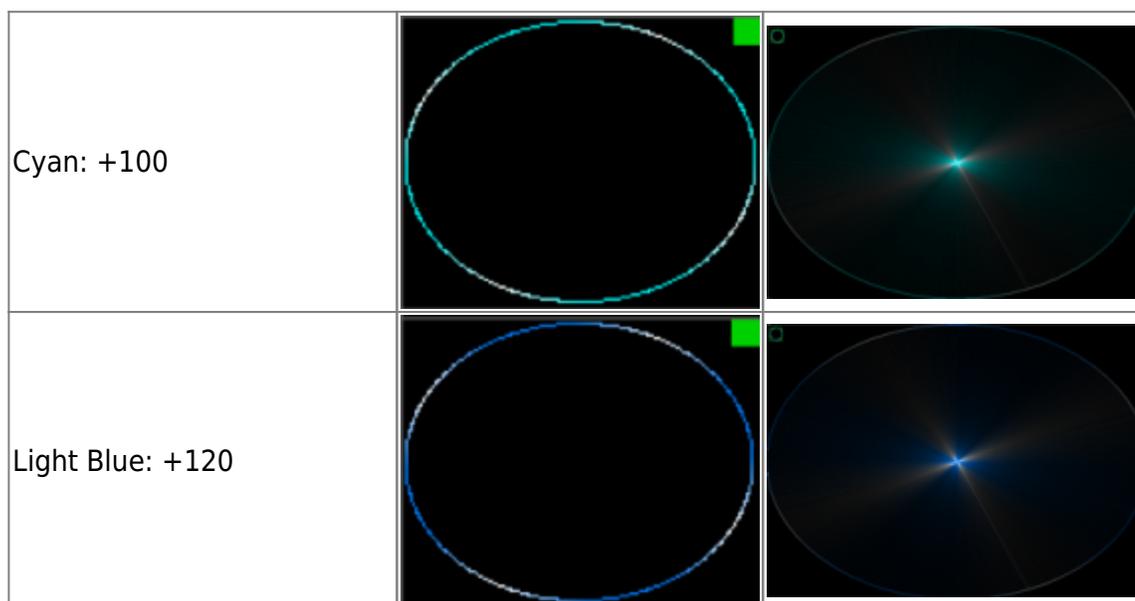

Simples

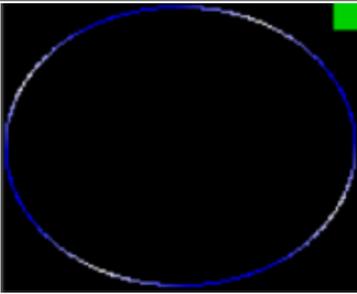

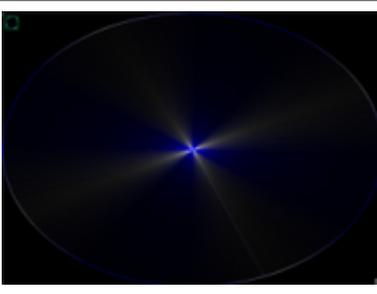

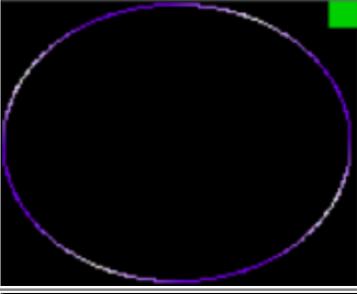

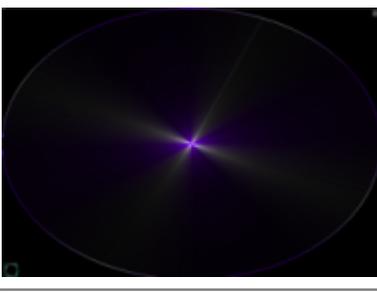

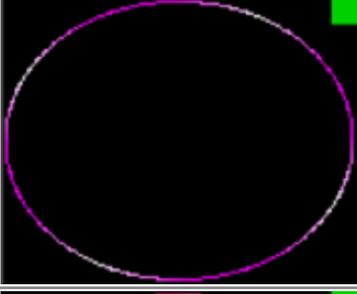

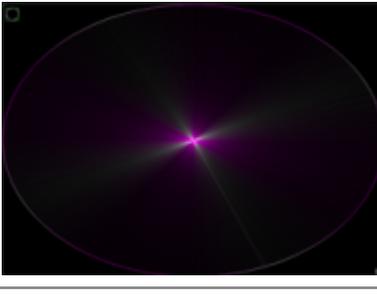

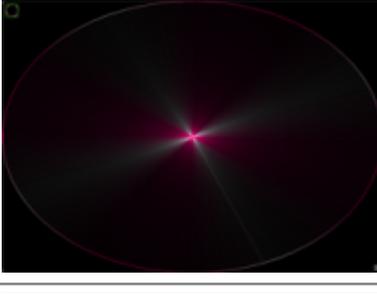

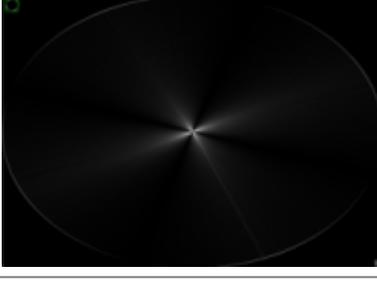

Our medium Sized pack. Takes the simples from before and adds a bunch of color variations on the gobos. These colors are separated by 20, so 21-40 is Red, 41-60 is orange, etc. This makes the whole pack 960 cues.

At this point there will no longer be numbers in the top left of the picture, but the pattern will remain

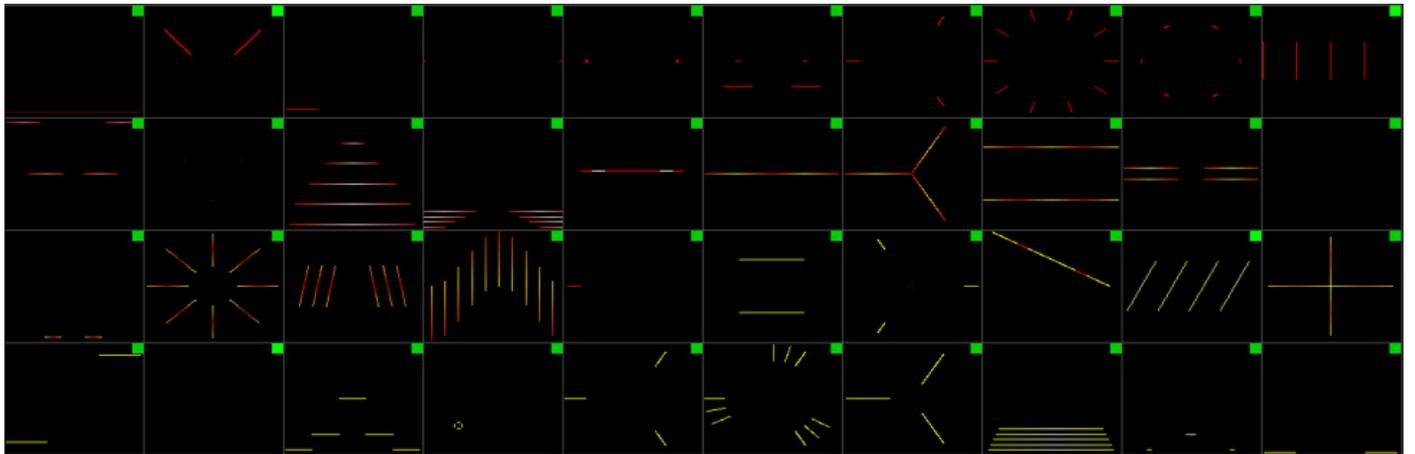

Dark Blue: +140		
Purple: +160		
Magenta: +180		
Pink: +200		
Negative Space White: +220		

Full Pack

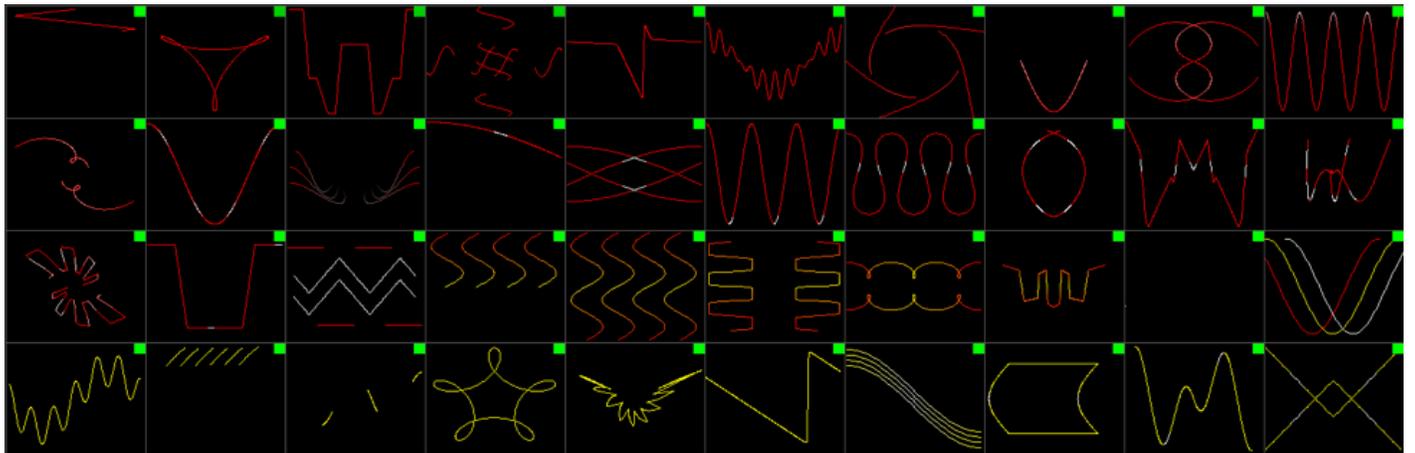

The full pack includes all the simple shapes above as well as 540 other cues. These are organized by their color, and complexity within each page. Full pictures of entire cue sets are at the back of this packet.

This whole set is split up into the following pages:

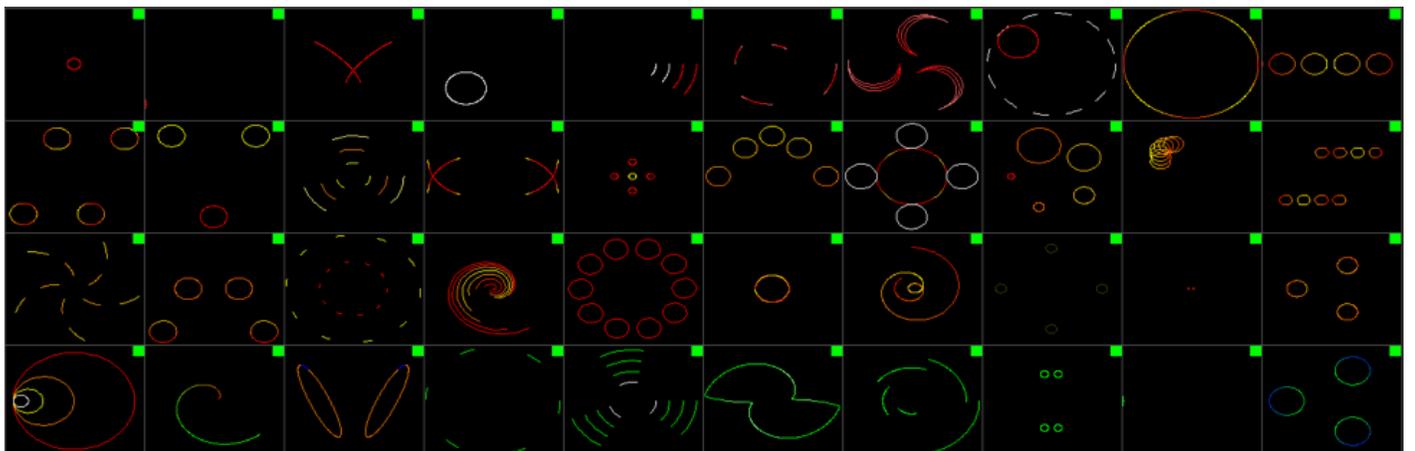

Page 5 - Sheets

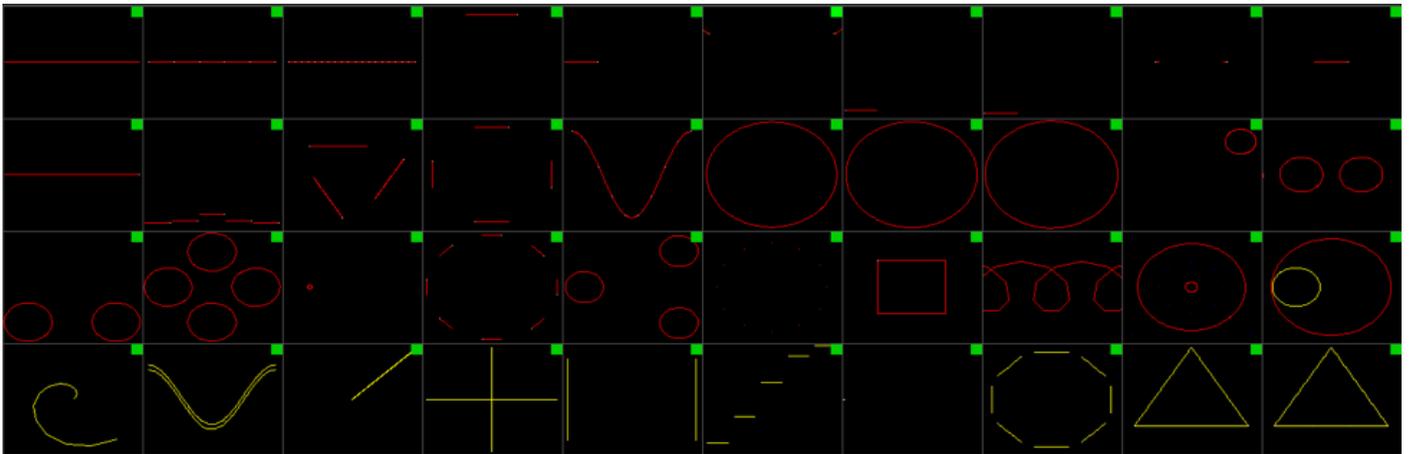

Page 6 - Waves

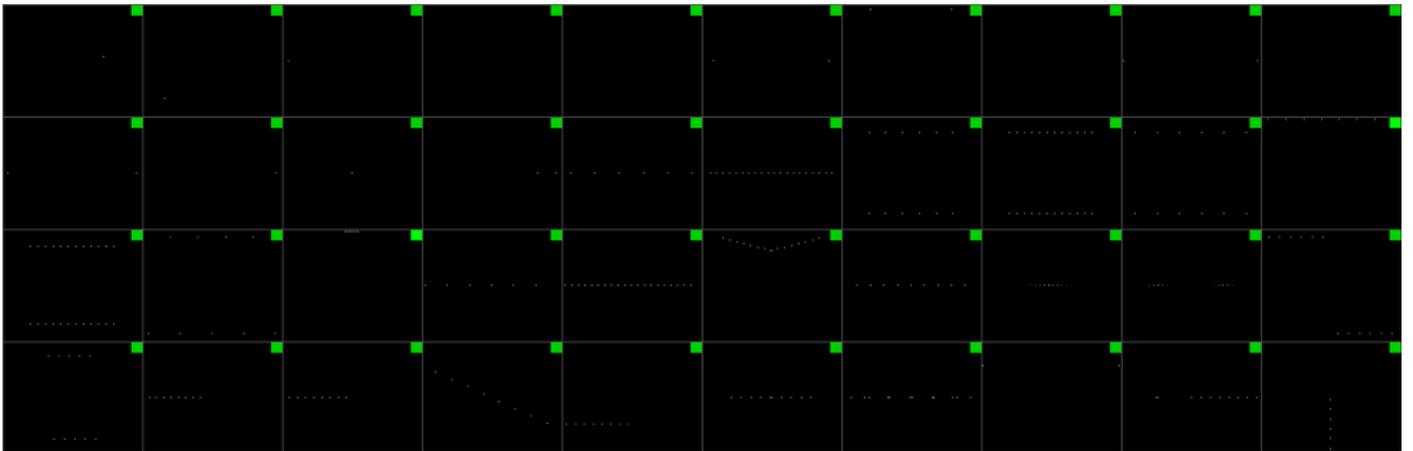

Page 7 - Cones

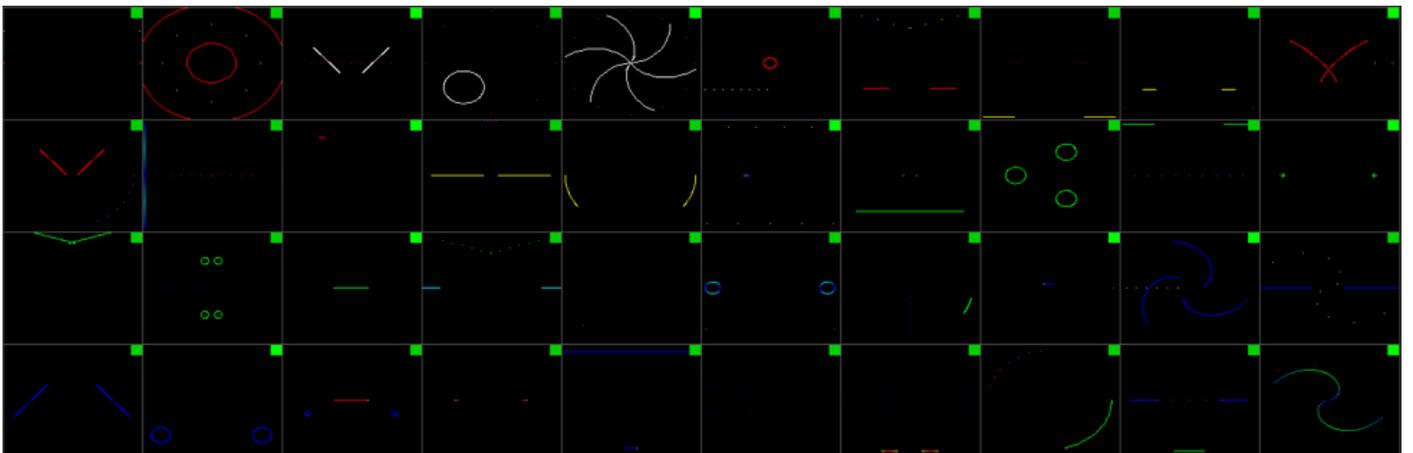

Page 8 - Spokes

Page 9 - Points
