

Send2B for BEYOND

Send2b.exe is a small application that allows you to execute **Pangoscript** commands from the command line. This comes in handy when you want to execute a PangoScript command from within Windows Task scheduler or when you want to execute a curl command from a simple website. As Send2b.exe works with PangoScript, BEYOND advanced or higher is a requirement.

Download

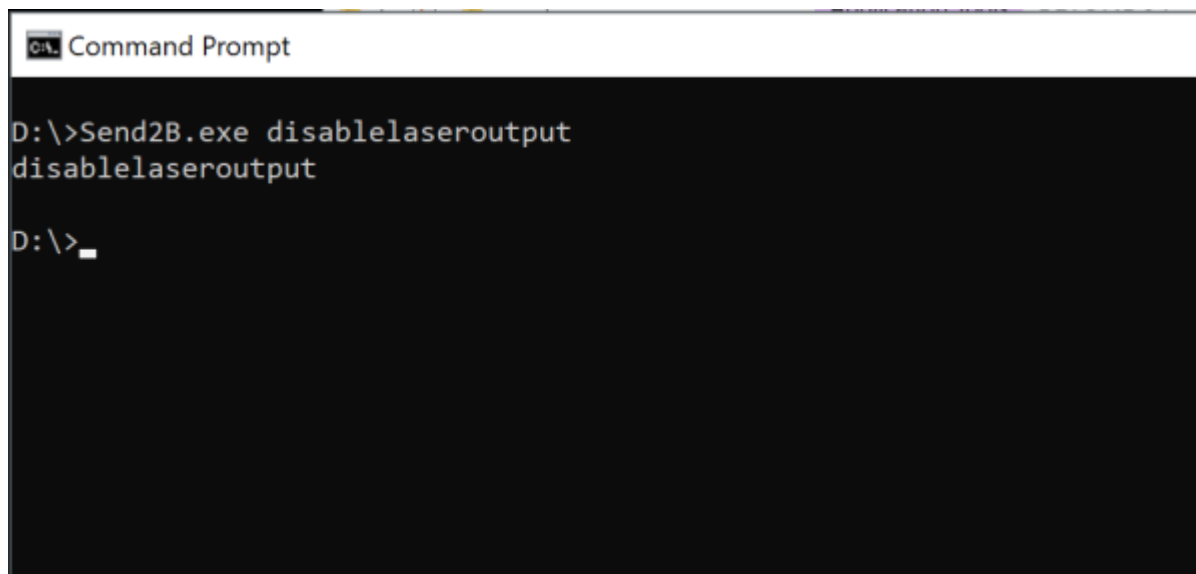

Send2B.exe is a small exe file that can be downloaded in Zip format by clicking here :

[Send2B.zip](#)

Instructions

From the command line you can type in an easy command as:

Send2B.exe disablelaseroutput

A screenshot of a Windows Command Prompt window. The title bar reads "Command Prompt". The command prompt shows the following text: "D:\>Send2B.exe disablelaseroutput", followed by "disablelaseroutput" on the next line. Below that, it shows "D:\>_" with a cursor, indicating the command has been executed and the prompt is ready for the next input.

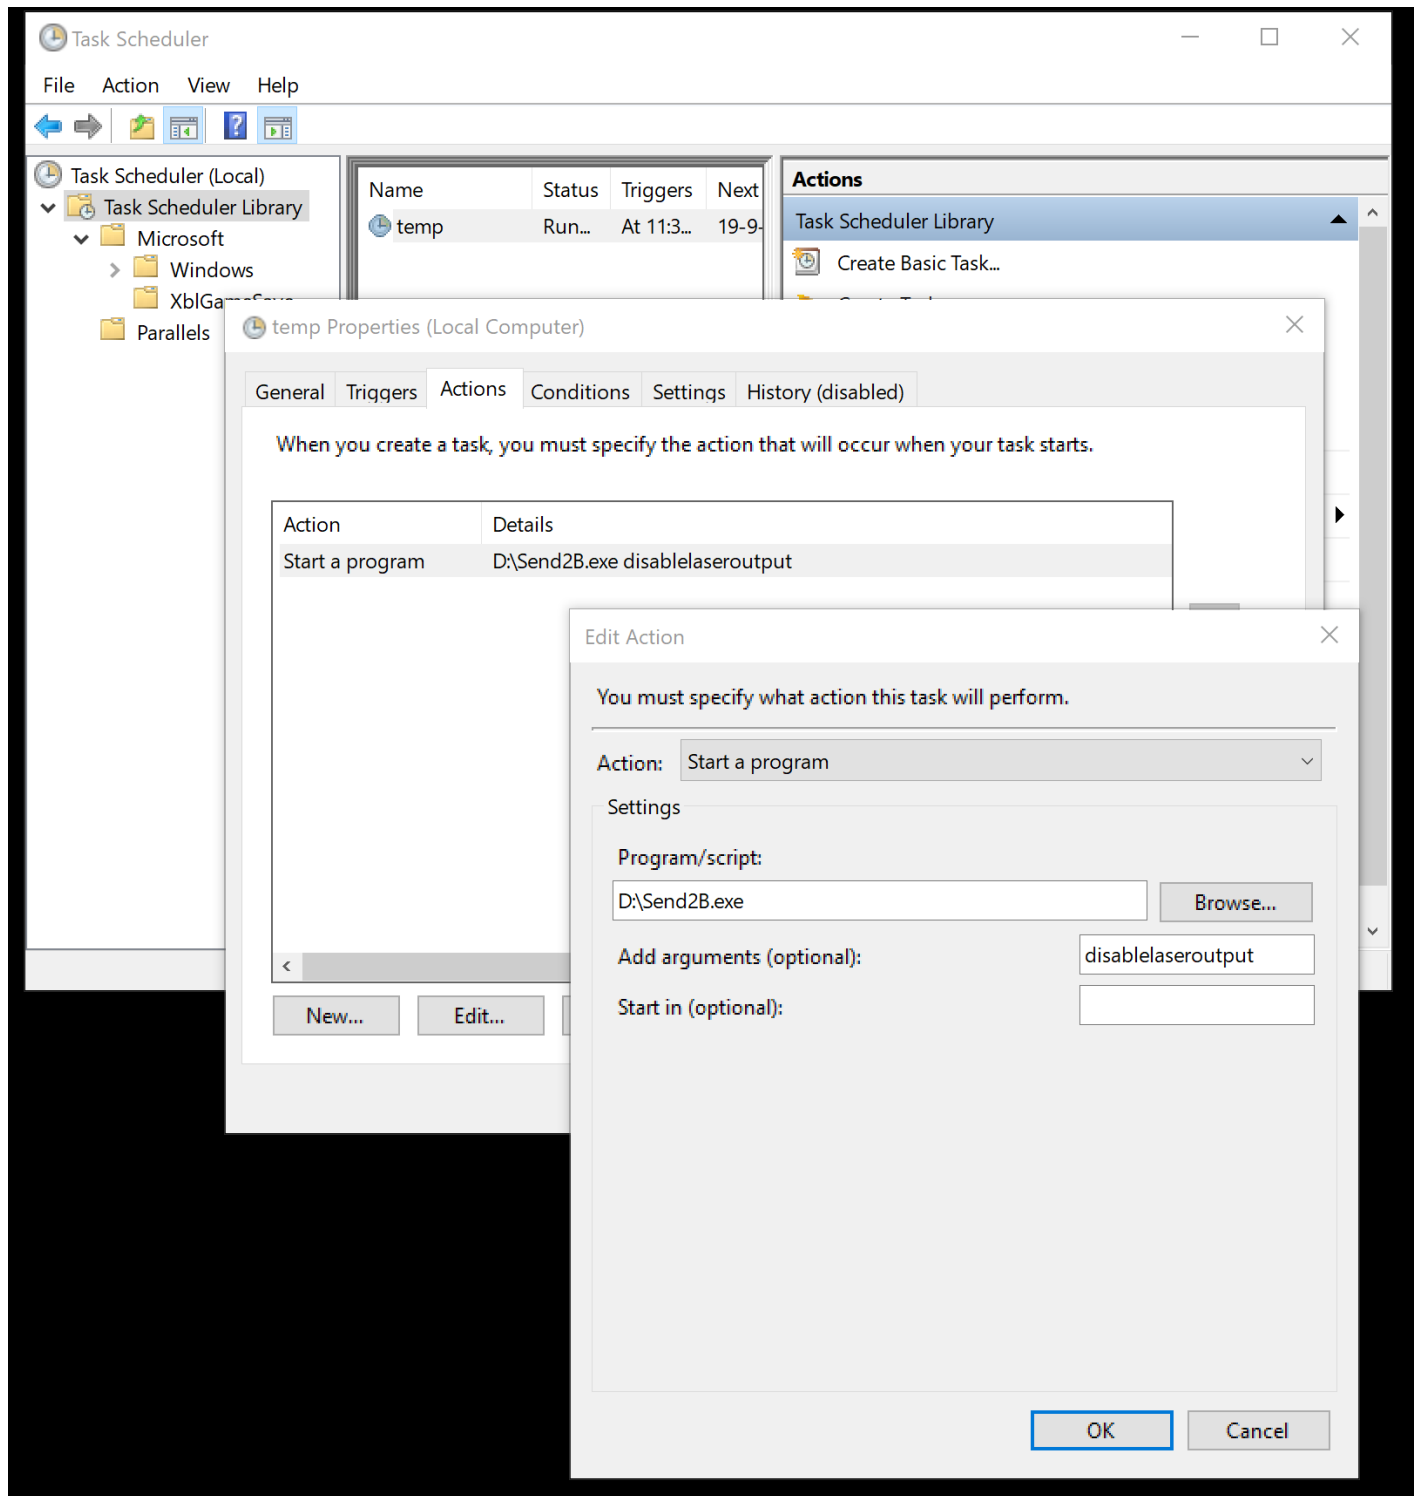

```
Command Prompt
D:\>Send2B.exe disablelaseroutput
disablelaseroutput
D:\>_
```

<WRAP round important> Note that Send2B.exe is case sensitive and that typing in **“.exe”** is required.
</WRAP>

Windows Task Scheduler example

On all versions of Windows, the task scheduler can be opened by pressing the **“Windows + R”**, then type **“taskschd.msc”** in the Open field. After **“Enter”**, the Windows task scheduler will be opened and a

command can be executed as shown in the example below.
