How to use the HTTP Server in BEYOND

Video description: The BEYOND HTTP server is a way for users to develop their own UI, tools and plugins for BEYOND through their preferred development pipeline.

The HTTP server became available to Ultimate users during the BEYOND 5.8 Release.

Chapters:

- 0:00 Introduction to the BEYOND HTTP Server
- 0:36 Enabling the HTTP Server
- 1:44 Using the Demo File
- 2:21 Thank you for Watching
