

Midi Maps

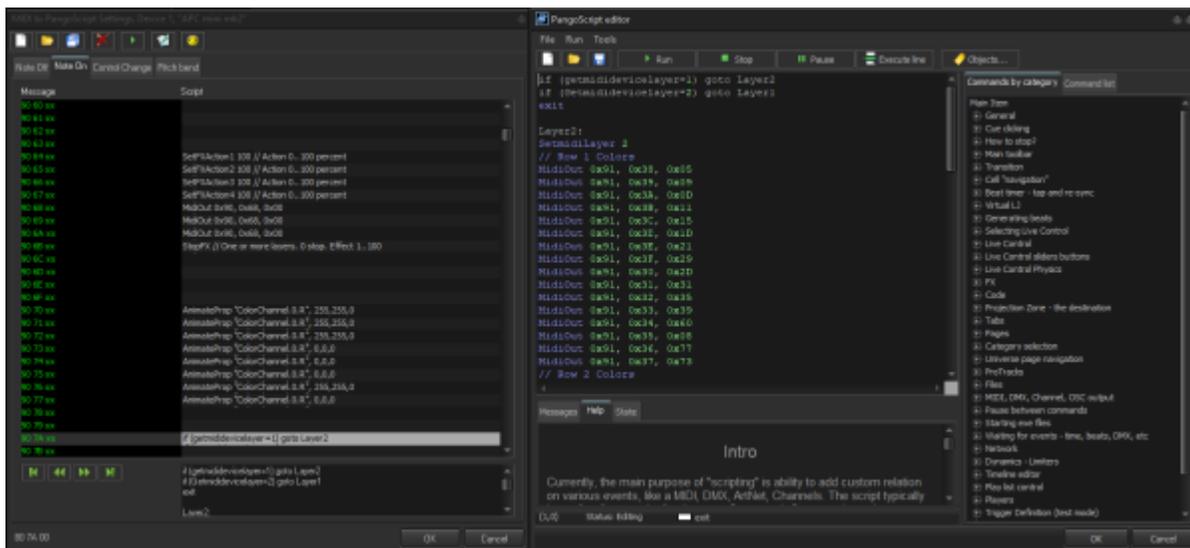

Pangolin Internal Examples

Akai APC Mini MK2 Quick FX and Color Picker

This midi map was built as a “sidekick” to an APC 40 MK2, built for the Quick FX, and Color channels 1-4 picker on the second layer.

This map shows off how you can combine built in tools, (The quick FX) and custom programming with Pangoscript (the color picker) on separate midi layers.

Check out the layer flipper, and the layer specific codes on the main buttons.
