Advanced Text editor

In addition to the QuickText feature, QuickShow also includes and Advanced Text editor capable of doing far more intricate work. The main window of the Advanced Text editor is shown below, along with an explanation of the main controls.

🖥 Advanced Text Editor

	Default Left Center Right	
	Character base point Y	
	Default Bottom Center Top	
OK Cancel		

Applying effects to the entire text image, or to individual

characters

The Advanced Text Editor allows you to apply an effect to the entire text image, or to individual characters within the text image. When using the Character effect tab, it's easy to create effects which are particularly dramatic. With just a few mouse clicks, it is possible to make text that automatically waves and groves to the beat of the music.
