Virtual MIDI Keyboard

The **Virtual MIDI Keyboard** can be seen at the bottom of the cue grid.

The **Virtual MIDI Keyboard** illustrates the mapping between cues and MIDI keys. If you press a cue in the grid, you will be able to see which MIDI key is mapped to that cell. Likewise, if you click on a MIDI key with your mouse, this will trigger the associated cue. And finally, as MIDI messages come into the computer, you will see these keys activate and deactivate. In this way, the **Virtual MIDI Keyboard** can act as a troubleshooting tool.
